Notes:

Conf Date-Date release occurred or was discovered. Where the date is unknown, the default date is the effective date of the Tank Act (August 5, 1989).
 USTPT-Underground Storage Tank containing petroleum
 ASTH2-Underground Storage Tank containing hazardous substances
 AST-Above Ground Storage Tank
 STAT-Cleanup status of the incident
 1 - Interim Remedial Actions Not Initiated - No physical activity to remove contaminants has been initiated
 2 - Interim Remedial Actions Initiated or Completed - This means that physical activity to remove contaminants is underway or complete
 3 - Attainment Monitoring in Progress - Demonstration of an Act 2 groundwater standard is being conducted
 4 - Cleanup Completed - Removal of contaminants to applicable cleanup standards has been demonstrated to DEP
 5 - Inactive - Incidents in this status have not achieved 'cleanup completed' status. However, these incidents have been determined by DEP to be low priority for corrective action as a result of meeting the following criteria
 -No product in the leaking storage tank system
 -No known free product in the environment
 -Risks to human health and the environment have been mitigated including vapor/inhalation hazards, contaminated drinking water supplies, and releases to surface waters
 -Strong potential for receptors to be impacted is not known to exist
 -Responsible party is not performing or planning to perform corrective action
 -The case is at least two (2) years old
